can't get this game on full screen want my money back. This is the second of the Hidden Expedition series. It is still old-school, more like one of the Jewel Quest games than a "modern" HO game. In this game, you also have to outwit and outrace other teams to get to your goal.

Get the bundle, and maybe on discount.. Would have really enjoyed this game. Unfortunately it won't go full screen and the window is so small that you can't actually find and pick out the hidden objects! Going to ask for a refund.. This game like most of the older Hidden Expedition games does not run well on Windows 10. When you quit the game, Steam still shows it as "Running". Also the graphics resolution is horrible on a high-end system, with no way to adjust it either. Yet, it's still fun to play, but a little annoying with no tutorials or instructions as what to do.. Guess you have to guess what you're supposed to do.
